Oklahoma: Explosive Device Detonated in Mailbox

On 14 January 2023, at approximately 0000 hours local time, Oklahoma County Sheriff's Office deputies responded to a residence on South Henney Road and Southeast 29th Street after unknown suspects detonated an explosive device inside the mailbox. No further device details have been released, but surveillance footage shows a suspect placing the explosives inside the mailbox, followed by two explosions. Oklahoma County Bomb Squad technicians responded to assist. No injuries were reported, and the investigation is ongoing.

North Carolina: IID Discovered Near Daycare Following Fire

On 17 January 2023, at approximately 2130 hours local time, the Wendell Police Department and Wendall Fire Department responded to a daycare on Raymond Drive due to a reported fire. Officers discovered an improvised incendiary device (IID), described as a Molotov cocktail, near the building. According to media reporting, the IID appeared to consist of a wine bottle containing a flammable chemical with a burned cork sticking out the top. No injuries were reported, and no further device details have been released. The investigation is ongoing.

Weekly Domestic OSINT Report

14JAN2023 to 20JAN2023

INDEX

¹ **The Infrastructure Categories** listed in this report are derived from the DHS Critical Infrastructure Sectors:

Chemical	Financial Services	Healthcare and Public Health
Commercial/Retail	Government Facilities	Information Technology
Communications	• Courthouse	Nuclear
Critical Manufacturing	• Federal	Transportation Systems
Dams	• State	Water
Defense	• Local	Non-Critical Infrastructure
Industrial Base	• National Monuments	• Other (e.g., faith-based facilities)
Emergency Services	• Parks	• Postal and Shipping
Energy	• Schools	• Private Residence
Food and Agriculture		

DISCLAIMER:

This product provides a statistical analysis of available open-source reporting of explosives-related events, bomb threats, and improvised explosive device (IED) activity in the United States and its territories. Due to the nature of open-source intelligence (OSINT) collection, this data may not reflect all bomb-related incidents or casualty figures during the stated period and does not include classified or law enforcement sensitive information. Incidents that received a response from authorities, law enforcement, and/or first responders are frequently reported only through official channels, such as locally held police logs. Therefore, the information may not be available and/or captured in the data used to compile this report.

² **The Incident Types** used in this report are defined as follows:

- Bomb-Making Material (BMM): Materials commonly associated with IEDs but which were not assembled into a functional device at the time of discovery; this category includes both discoveries and thefts
- Bomb Threat: An intentionally false claim of the presence of a bomb at a certain location
- Device Discovered: The discovery of a hazardous device before the device was emplaced at the targeted location
- Device Emplaced: The discovery of a hazardous device emplaced at a targeted location
- Device Functioned: A hazardous device functioned
- Suspicious Package Discovered: The discovery/examination of an ultimately non-hazardous package

³ **The Federal Regions** used in this report consist of:

Region 1	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
Region 2	New Jersey, New York, Puerto Rico, U.S. Virgin Islands
Region 3	Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia
Region 4	Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee
Region 5	Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin
Region 6	Arkansas, Louisiana, New Mexico, Oklahoma, Texas
Region 7	Iowa, Kansas, Missouri, Nebraska
Region 8	Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming
Region 9	Arizona, California, Hawaii, Nevada, American Samoa, Guam, Trust Territory of the Pacific Islands
Region 10	Alaska, Idaho, Oregon, Washington

NOTE: Incident map and circle graph indicate Federal regions utilizing the same colors. Graph reads clockwise from top.
